SUMMARY

A dedicated front-end developer with expertise in bridging visual design and technical implementation. Focused on optimal web performance and a seamless user experience. Accustomed to working collaboratively in teams and eager to learn the latest technologies to deliver the best results for the company.

WORK EXPERIENCE

Game Shop App / March 2026

Developed a game catalog based on native data from Steam and Epic Games using React, Vite, and Tailwind CSS. Integrated a REST API with global state management and smooth UI animations using Framer Motion.

Inventory System / December 2025

Building an inventory website for structured goods management with complete data according to sales and expenses using Laravel and Tailwind CSS and MySQL

TixID Clone / November 2025

Developed a full-stack movie ticketing platform featuring dynamic seating selection and a multi-role dashboard. Integrated QR code payments, PDF tickets, and Excel reporting using Laravel and Tailwind CSS.

EDUCATION

Wikrama Vocational Hlghschool 2024 - 2027

- Studied programming basics and fundamental concepts.
- Developed dynamic and responsive web applications.
- Gained hands-on experience with tools such as Laravel.
